

Slash User Guide

1. Introduction

1.1 Purpose

Slash is an advanced price comparison tool designed to scrape top e-commerce websites and provide users with the best deals on searched items. The platform simplifies online shopping by integrating features like wishlist tracking, product comparison, and AI-powered recommendations.

1.2 Audience

The primary users are:

- **Students:** Budget-conscious individuals looking for efficient ways to shop for essentials.
- **Data Analysts:** Professionals requiring real-time datasets for their projects.

1.3 Prerequisites

- Basic familiarity with Python and web-based interfaces.
 - Google OAuth credentials for secure login.
-

2. Getting Started

2.1 System Requirements

- Python 3.x installed on your machine.
- Operating System: Windows, macOS, or Linux.
- A stable internet connection.

2.2 Installation

To install Slash, follow these steps:

Clone the Repository

```
git clone https://github.com/se2024-jpg/Slash.git
```

```
cd slash
```

1. Run Installation Script

Execute the `install.py` script, which handles dependency installation and configuration:

bash

Copy code

```
python3 install.py
```

2. During installation, you'll be prompted to enter:

- Google OAuth Client ID
- Google OAuth Client Secret

3. Run the Application

Start the Flask application: `flask run`

4. Access Slash

Open your browser and navigate to: `http://localhost:5000`

3. Key Features

1. **Product Comparison:** Compare specific products side by side across multiple websites.
 2. **Wishlist Tracking:** Save and track prices of products for future purchases.
 3. **AI Recommendations:** Personalized suggestions based on past searches.
 4. **Secure Google OAuth Login:** Streamlined authentication process.
 5. **Price Drop Alerts:** Receive notifications when saved products experience price reductions.
-

4. Navigating the Interface

The user interface is designed for ease of use:

- **Navbar:** Access Wishlist, Product Comparison, and other features quickly.
 - **Search Bar:** Perform product searches efficiently.
 - **Comparison Section:** Input details for products to compare prices and specifications.
-

5. Using Slash

5.1 Product Comparison

1. Navigate to the **Product Comparison** page.
2. Input the names and websites for two products.
3. Click **Compare** to see results displayed in a side-by-side table format.

5.2 Wishlist Tracking

1. Add products to your wishlist.
2. Track price changes or availability notifications for saved items.

3	BERANMEY Christmas Reindeer Slippers for Womens Mens Plush Warm Santa Claus Slippers Fuzzy House Slippers Christmas Gifts For Girls Women Girlfriend	\$10.00	walmart	★ 4.5	Remove

7. Troubleshooting

6.1 Common Issues

- **Login Issues:** Ensure Google OAuth credentials are correctly configured.
- **Missing Dependencies:** Re-run `install.py` to resolve setup errors.

6.2 Support Resources

For additional help, visit the [Support Page](#).

7. FAQ

- **How secure is my data?**
Slash uses Google OAuth and centralized databases for enhanced security.
 - **Can I add custom e-commerce sites?**
Currently, this feature is not supported.
-

8. Appendix

8.1 Glossary

- **OAuth:** A secure authentication framework for verifying user identity.
- **Flask:** A Python web framework used to build the Slash application.
